

INSTRUCTION MANUAL

SET-UP WITH THE ZODI X-40 OUTFITTER HOT SHOWER

1. Before use squeeze any kinks from hoses.
2. Attach pump directly to X-40 Hot Shower or use included 6 ft garden hose if needed.
3. Completely submerge pump in water source (e.g., in a bucket or lake). Shake pump under water to release any trapped air.
4. Connect pump power cable to 12 volt power source to establish water flow from X-40 showerhead. Water should be flowing from output X-40 showerhead within 20 seconds, if not, apply suction to the end of the hose / showerhead to release vapor lock. DO NOT place the pump directly on sandy river or lake beds. Place the pump on top of pebbles or rocks. To prevent waves from pushing pump onto shore, place a small rock on pump, making sure water flow isn't restricted. If water flow is low, check power source or clean foam debris screen by unscrewing cap on pump.

SHOWERING

Turn pump on. Water will begin spraying from showerhead. Conserve water by placing showerhead in water bucket between uses. Water flow must never be reduced or turned off when heater is on. Adjust propane valve to obtain desired water temperature.

SHUT DOWN

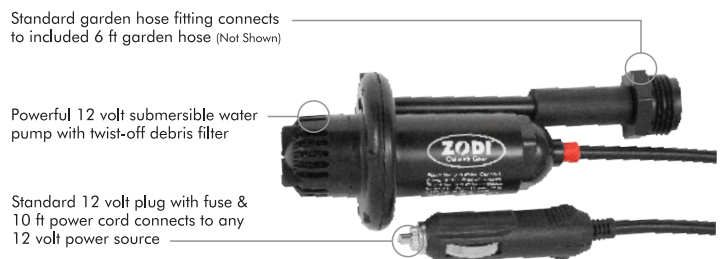

Turn propane valve on heater off then turn off power to pump. Drain water from heater, hoses and showerhead. After use, unscrew pump cap, clean foam debris screen and rinse pump in clean water.

CAUTION: Pump must always be submerged when operating. IF WATER PRESSURE DROPS, OR WATER TEMPERATURE INCREASES, IMMEDIATELY TURN SHOWERHEAD AWAY FROM BODY AND SHUT OFF PROPANE VALVE ON FRONT OF HEATER UNTIL PROPER WATER PRESSURE IS REGAINED. WATER MAY BE VERY HOT, KEEP CLEAR OF SHOWERHEAD UNTIL DESIRED WATER TEMPERATURE IS OBTAINED.

TECH SUPPORT

If you are having a problem with your Zodi™ 12 Volt Pump with Garden Hose Connection please try a new power source, check for kinked hoses, clean out pump filter by twisting pump cap off, check pump fuse by twisting cap off power plug, if still not working then call Zodi at 800-589-2849 for tech support.

Note: The pump includes a garden hose connector that is designed to connect directly to the Zodi X-40 or to the included 6ft Zodi hose or to user supplied garden hose. For best performance always use short hoses with low elevation gains.

Assembled in China. Designed in Park City Utah USA.

ZODI™ UPGRADES

Zodi™ Shower Pole

Enjoy hands-free showering. Adjustable height. Works with all Zodi™ Showers and Zodi™ Hut shower shelter.

Item# 1068

Hot Tap™ X-40 Shower

Our on-demand shower designed for Outfitters. Enjoy unlimited hot water in seconds.

Item# 5146

i.HUT™

Enjoy this self-supporting privacy shelter anywhere. Almost 4 feet wide per side. Includes oversized detachable floor.

Item# 1077
